

# PROGRAM OF STUDY REQUEST FORM

PDF FILLABLE FORM – Please complete electronically before submitting to your committee for signatures.

WASHINGTON STATE  
UNIVERSITY

ARE YOU CURRENTLY STAFF/FACULTY AT WSU? Select One

NAME: Nathan Waltz

WSU ID: 011608558

DEGREE: M.S.  PROGRAM: Computer Science

THESIS/NON-THESIS: Thesis

## RESEARCH AREA/GENERAL TOPIC: Automated Reasoning

Some areas of inquiry require research review before you may use certain subjects or materials in your research. Please complete the following questions to help determine if your research may require institutional review:

- Does your research involve human subjects, including asking individuals to complete a survey?  NO
- Does your research involve animal subjects, biohazardous and/or radioactive materials, or recombinant DNA (rDNA)?  NO

If you answered "Yes" to either of these questions, your research may require institutional review. Please contact the Office of Research Assurances ([www.ora.wsu.edu](http://www.ora.wsu.edu)) for information. Evidence of institutional review, or an exemption statement, will be required when scheduling your final examination.

## INSTRUCTIONS FOR COMPLETING THE PROGRAM OF STUDY REQUEST FORM:

Students must complete this document in accordance with [Chapter 6.G \(Program of Study\)](#) of the Graduate School Policies and Procedures and in consultation with their advisor/committee chair and their committee. Once the program is completed and signed, submit this form to your academic coordinator for graduate program review and subsequent forwarding to the Graduate School. This form is due to the Graduate School by the deadlines provided in the Deadlines and Procedures documents available on the [Graduate School forms website](#).

**Once approved, this program of study becomes the student's individual degree requirements, to the extent that it is completed correctly. The Graduate School reserves the right to require error corrections.** Students may have one approved program of study for each graduate program. Any changes initiated by the student or graduate program, no matter how extensive, must be made using the Program Change Form and/or Committee Change Form available on the [Graduate School forms website](#).

## FACULTY ADVISORY COMMITTEE INSTRUCTIONS:

Proposed graduate committees must meet all Graduate School requirements as well as any requirements listed in the graduate program's bylaws and graduate program handbook. For details on committee requirements, refer to [Chapter 1.D.2 \(Graduate Program Participants\)](#), [Chapter 7.B \(Master's Advisory Committee\)](#), and [Chapter 8.B \(Doctoral Advisory Committee\)](#) of the Graduate School Policies and Procedures.

**Any deviation from university committee requirements necessitates an Exception to Policy to officially document the exception.**

The Vice Provost for Graduate and Professional Education reviews and makes final determinations on such exception to policy requests.

## FACULTY ADVISORY COMMITTEE:

The signatures of the student, advisor, committee, and graduate program signature authority are required and signify that the below listed individuals have reviewed all pages of this program of study request and found it meets all Graduate School and program requirements and is acceptable for an advanced degree in the student's field. Additionally, the individuals designated as members of the advisory committee agree to serve in this capacity and perform all required functions of this appointment.

COMMITTEE CHAIR	GRADUATE PROGRAM	SIGNATURE AND DATE
COMMITTEE MEMBER (INDICATE IF SERVING AS CO-CHAIR)	GRADUATE PROGRAM	SIGNATURE AND DATE
COMMITTEE MEMBER	GRADUATE PROGRAM	SIGNATURE AND DATE
COMMITTEE MEMBER	GRADUATE PROGRAM	SIGNATURE AND DATE
COMMITTEE MEMBER	GRADUATE PROGRAM	SIGNATURE AND DATE
COMMITTEE MEMBER	GRADUATE PROGRAM	SIGNATURE AND DATE
DEPARTMENT CHAIR SIGNATURE AND DATE	 Nathan Waltz	
MINOR DEPARTMENT CHAIR SIGNATURE AND DATE (If Applicable)	STUDENT SIGNATURE AND DATE

UNIVERSITY**

## **COURSEWORK INSTRUCTIONS:**

The student must supply accurate information regarding courses taken and courses proposed for this graduate degree. Students may only list specific courses – entries such as “PREFIX 5XX” are not acceptable. Details regarding degree requirements are available in [Chapter 6 \(General Requirements\)](#), [Chapter 7 \(Master’s Degree Requirements\)](#), and [Chapter 8 \(Doctoral Degree Requirements\)](#) of the Graduate School Policies and Procedures, and within the graduate program handbook. **It is the student’s responsibility to know and meet all program of study and degree requirements of the Graduate School, as well as the requirements of their specific degree program.**

## **COURSEWORK: Graded (A-F)**

**If transferring coursework from another institution, please submit the course syllabus along with this form.**

**IF YOU NEED MORE ROOM FOR GRADED COURSEWORK, PLEASE ATTACH ADDITIONAL COPIES OF THIS PAGE.**

Subtotal Credits of Graded Coursework: **6.0**

## **COURSEWORK: Non-Graded (S/F)**

List any S/F coursework in this space – please provide the specific course prefix, number, and the total number of credits for each course.

Subtotal Credits of Non-Graded Coursework: \_\_\_\_\_

Research Credits (701 Capstone / 702 Non-Thesis / 700 Thesis / 800 Doctoral): \_\_\_\_\_

**Course Title: Structure and Implementation of Modern Programming Languages (SIMPL)**

**Instructor(s): Dr. Siddhartha Chatterjee**

**TA(s): Tyler Collins, Peter Gao, Aaron Wollman.**

**Office Hours:**

The instructor will hold virtual office hours through Zoom by appointment only.

TAs will hold virtual office hours through Zoom according to the schedule below, and by appointment.

- Tyler Collins: MF 20:00-21:00 CT.
- Peter Gao: W 15:00-17:00 CT.
- Aaron Wollman: TuTh 14:00-15:00 CT.

**Course Overview/Objectives:**

Programs written in high-level programming languages are the bridge between an algorithm's intent and the machine instructions realizing that intent. Driven by higher-level abstractions in modern programming languages and advances in instruction sets and micro-architectures, today's set of technologies for translating high-level program text to binary machine code have expanded significantly beyond the "classical" set of compilation technologies developed in the 1960s. This class samples the breadth of these technologies within a unified cost-benefit-risk analysis framework, and illustrates system integration by building a series of compilers for LiveOak, a pedagogical object-oriented language.

Core topics include the theory and practice of lexical analysis, syntactic analysis, code generation, language-level virtual machines, and dynamic memory management.

**Prerequisites:**

The student should have experience with significant programming in Java, emphasizing the use, augmentation, and integration of pre-existing components. Prior courses in programming languages, assembly language, compilers, computer architecture, and automata theory are helpful but not required.

**Textbooks:**

None.

## List of Topics:

Week	Topics	Assignment	Exam
1	Course introduction. LiveOak, SaM.	SaM String Library	
2	Practical parsing and code generation for SaM.		
3	Theory of lexical analysis.	LiveOak-2 to SaM Compiler	
4	Theory of syntactic analysis.		
5	None.		Mid-term
6	Objects, classes, and inheritance.	LiveOak-3 to SaM Compiler	
7	Implementing LiveOak-3.		
8	Semantic analysis. Type checking.		
9	Memory management. Garbage collection.		
10	None.		Final

## Assignments:

There will be three programming assignments, ranging in duration from two to four weeks. All programming assignments must be attempted and completed individually. The programming language for the assignments is Java. Assignments will be submitted on-line for grading, and will be auto-graded. Repeated submissions are allowed and encouraged. The date of the last submission will be considered for computing slack days. Plagiarism-detection software will be used to flag possible violations of academic integrity.

Additionally, several *optional* problem sets will be handed out. These are intended solely to improve your understanding of the subject matter and help you prepare for the exams. You may work on them individually or in groups. The answer key for an individual problem set will be released in the edX course two hours after the problem set is due.

## Exam(s):

There will be two timed on-line exams: a mid-term and a final. Both exams will be open-book and open-notes. The mid-term exam will be held in week 5 and the final exam in week 10 of the course. Each exam will be open for a 120-hour period to allow students flexibility in taking them, and must be attempted in a single sitting. Further details will be distributed via Canvas and Piazza once they are finalized.

## Grading Policy:

- Programming assignments are worth 60% of your grade.
- Exams are worth 40% of your grade (20% for mid-term, 20% for final exam).
- Exam grades may be curved. Program grades will not be curved.
- Grade cutoffs are as follows: A: 90% or higher; B: 80%-89.9%; C: 70%-79.9%; D: 60%-69.9%; F: 59.9% or lower.

- Problem sets are voluntary and do not count towards your grade. However, evidence of attempting them may be used to adjust borderline grades upwards.

### **Program Grade Requirements:**

30 hour program

9 required hours

21 elective hours

Required courses, B- or higher.

Elective courses, C or higher.

To graduate, all students must have a graduate GPA average of at least 3.00.

### **Late Policy:**

Five slack days will be available for the semester and may be applied (in units of full days, i.e., no fractions of days) towards programming projects. Individual projects may limit the maximum number of slack days that can be applied toward them.

### **Tech Requirements**

- Laptop or personal computer with the following requirements
  - OS: Windows 10 or Mac 10.12/10.13/10.14
  - At least 2GB of free hard drive space
  - Dual-Core 2.4Gz Processor or better
  - 4GB RAM or better
  - Internet Connection: Cable modem/DSL or better (500kbps download, 300kbps upload)
  - Browser: Latest version of Google Chrome or Firefox (Chrome is preferred)
- Smartphone or scanner to take pictures and make PDFs of homework submissions
- Smartphone or other device capable of being used for dual-factor authentication

### **Academic Integrity in This Online Course**

The online course format allows for multiple methods of identity verification and monitoring/detection of collusion, collaboration, and plagiarism. A violation of the course policy may include (but is not limited to) the following:

- Providing your UT EID to any other person.
- Collaborating or sharing information with another person regarding the material on any quiz, assessment, or assignment, before, during, and/or after any quiz, assessment, or assignment.
- Recording any quiz, assessment, or assignment material in any format
- Failing to properly cite language, ideas, data, or arguments that are not originally yours.
- The public (such that it can be viewed by more than one person) posting of any form of a test bank or group of questions from any assignment.
- Consulting forbidden materials or sources of information.

The University of Texas at Austin Academic Integrity principles call for students to avoid engaging in any form of academic dishonesty on behalf of yourself or another

student. Grade-related penalties are routinely assessed ("F" in the course is not uncommon), but students can also be suspended or even permanently expelled from the University for scholastic dishonesty.

If you have any questions about what constitutes academic dishonesty, please refer to the [Dean of Students website](#) or contact the instructor for this course.

You must agree to abide by the [Honor Code](#) of the University of Texas. You will not work with or collaborate with others in any way while completing any of the graded course assignments.

### **Accommodations**

The University of Texas at Austin guarantees that students with disabilities have access to appropriate accommodations. You may request an accommodation letter from the Division of Diversity and Community Engagement, [Services for Students with Disabilities](#).

If you have approved accommodations for the course, please contact us to arrange them. Please do this as soon as possible, so that you can have the benefit of the accommodations throughout the duration of the course.

### **Course Etiquette**

We expect that you will treat online discussions as though you are having a civil, respectful discussion with your fellow classmates in the same classroom. Please refrain from using profanity or any euphemisms for profanity. Please do not bait other commenters or personally attack them. Please do not use sarcasm in a way that can be misinterpreted negatively. And please do not make the same point repeatedly. In short, please just respect the right of your colleagues to ask questions and discuss their opinions about the subject matter of our course on the discussion board. Violators of these discussion rules will simply be shut out from all class communications—email, Piazza, and office hours.

### **Academic Advisor Support**

If you have additional questions or require support from an academic advisor, please contact the program coordinator at [msonline@cs.utexas.edu](mailto:msonline@cs.utexas.edu).
